

REDUCE
VISCERAL
FAT

BIOSTIMOLOGY®
Naturally effective

Treatment of
15 x 45' sessions

-7 cm of
waistline

Reduction of
visceral fat

**Aesthetic Doctors • Nutritionists
Diabetologists • Gastroenterologists
Cardiologists • Endocrinologists**

Scanner view before and after ReduStim treatment:

Visceral fat
thickness
measurement
before:
51505 mm²

Visceral fat
thickness
measurement
after:
40193 mm²

REDUCE VISCERAL FAT UP TO 8,2%

SCANNER IMAGING STUDY OF VISCERAL FAT (2013)

Dr Bernadette Carpentier, Dr Habib Nouria
Medical scan clinic - Nouria

Evaluation of the impact of ReduStim on sub-cutaneous and visceral fat around the navel, using Scanner view has shown:

An average reduction of 5.45 kg in weight and 6% in BMI

An average reduction of 7 cm on waistline

-8.2% in visceral fat and -4.1% in sub-cutaneous fat

An average reduction in transaminase ASAT and ALAT of 17.4% and 18% respectively.

STUDY CONCLUSION:

REDUSTIM BioEnergetic fields permit a very significant reduction of visceral fat and sub-cutaneous fat.
